

Sustainable Development Project

Sustainable Development Projects- If you ever attended those boring Social Studies lectures, you already have had heard of the word Sustainable Development! Or if you are here, wondering what is it, you are at the right place. In this article, we got covered: sustainable development definition, the sustainable development goals, sustainable development, sustainable development projects and also the sustainable development with examples. So, why wait? Let us jump to the topic!

What is the sustainable development definition for class 10?

Sustainable development is a framework for achieving human development goals while also preserving natural systems' ability to supply natural resources and ecosystem services. It entails looking after the natural resources and ecosystem services that the economy and society rely on while development is underway. The desired outcome is a state of society in which living conditions and resources are used to meet human needs without jeopardising the integrity and stability of the natural system, ensuring a safer future for future generations. For this reason, sustainable development can also be defined as development that meets current needs without jeopardising future generations' ability to meet their own needs.

Sustainable Development Goals

Global concerns are addressed by sustainability goals, such as the current UN Sustainable Development Goals. Poverty, inequality, climate change, environmental degradation, peace, and justice are among the global concerns. The Brundtland Report of 1987 is largely responsible for the present notion of sustainable development. However, as the notion of sustainable development has evolved, it has shifted its focus to include economic, social, and environmental development for future generations.

The Sustainable Development Goals (SDGs) are a series of 17 interconnected global goals established by the United Nations General Assembly (UN-GA) in 2015 and targeted to be realised by 2030. These 17 interconnected global goals, known as the Sustainable Development Goals, are contained in an UN-GA Resolution known as the 2030 Agenda, or Agenda 2030.

The Sustainable Development Goals include:

1. No Poverty
2. Zero Hunger
3. Good Health and Well-Being
4. Quality Education
5. Gender Equality
6. Clean Water and Sanitation
7. Affordable and Clean Energy

8. Decent Work and Economic Growth
9. Industry, Innovation, and Infrastructure are the 17 Sustainable Development Goals
10. Inequality Reduction
11. Sustainable Cities and Communities
12. Responsible Consumption and Production
13. Partnerships for the Goals
14. Climate Action
15. Life Below Water
16. Life On Land
17. Peace, Justice, and Strong Institutions
